

Webinar: Advances in Dementia Research

Updates on Risk and Protective Factors for Dementia

June 15th, 12:00 P.M. – 1:00 P.M. EST

Summary:

Presented by Dr. Jennifer Rabin, this webinar provides an overview of modifiable risk and protective factors that may delay the progression of Alzheimer's disease and other dementias.

Dr. Rabin will also review two studies that are open for participation in this area: 1) a virtual study that assesses what adults in Canada know about risk factors for dementia, and 2) a study based at Sunnybrook Health Sciences Centre that investigates risk and protective factors for dementia among people who identify as East Asian, South Asian, or White.

You will have the opportunity to ask questions.

About the presenter:

Dr. Jennifer Rabin is a clinical neuropsychologist and scientist in the Hurvitz Brain Sciences Research Program at the Sunnybrook Research Institute. She is also the Neuropsychology lead for the Harquail Centre for Neuromodulation at Sunnybrook Health Sciences Centre.

Dr. Rabin is an Assistant Professor in the Department of Medicine (Neurology) at the University of Toronto. Her research characterizes cognitive, behavioural, and psychosocial changes associated with neuromodulation strategies, and combines multi-modal neuroimaging (e.g., MRI, PET scans) with other cognitive measures to better understand modifiable risk factors for dementias.
